2 person has recommended Thomas

"Thomas has shown the most determination of anyone I have worked with at Luna Internet at the time. He was exposed to a lot of new technology very quickly, and mastered it very well. I'm glad to have worked with him, and if the opportunity would come up again, I would love to work with him again anytime, anywhere."

— **Stephan van Beerschoten, CISSP-ISSAP, CSCIP/G**, managed Thomas indirectly at Luna Internet

"What can I say about Thomas... When I met him during my years at Luna Internet he started doing customer support with a background of just repairing vacuum cleaners. I quickly learned that he was capable of just more than that, surpassing the level of requirements just needed for doing customer support and got him to work together in our Systems/Network operations group where he performed his duties outstanding and with resolve as a peer. When we both left the company I noticed, as we still kept in touch with each other, that this was not the end of his growth and managed to become a software engineer of significance for which he has my deepest respect."

— **Ruben van Staveren**, worked directly with Thomas at Luna Internet
